# OYSTER SERVER

Patent No. 111504

No. 3600/155

A practical and attractive service. The Oyster Plate has capacity for  $\frac{1}{2}$  dozen Oysters on the half-shell, with a cup for your favorite sauce. A spacious Ice Bowl heaped with ice will keep oysters chilled in preparation for and during service. The bowl is so designed that the plate fits on the top edge after the heap of ice is partially melted or if the bowl is not completely filled. A service plate completes the combination.
